PROJECTS

- **ShopForHome**
Shop for Home was aimed to revolutionize the way people shop for home goods and furnishings. The project involved the development of a user-friendly website that provided a convenient and immersive shopping experience for customers.
- **Home Rental System**
The purpose of this project is to provide an online platform for property owners to rent their home and tenants to search and book these rental properties. This project showcased my skills in software development, database management, and UI design.
- **Design & Development of Pneumatic sheet bending machine**
This project was aimed to design and develop such a machine which will help workers in industries to cut metal sheet accurately and fast as compared to traditional machines.
